PSYCHOLOGY, B.A.

Program Description
The Department of Psychology offers the Bachelor of Arts in Day and Evening Programs on Main Campus. Our curriculum was designed to prepare students for success in three general career paths: graduate study in Psychology, both research and applied; professional school (e.g., medicine, law, business); and entry directly into the workforce. The Psychology major requires 12 courses, none of which may be taken Pass/Fail.

Why Take This Major?
Psychology is a science that seeks to understand and describe human behavior and relationships. Students in this major will continuously build their awareness of the needs of our diverse society, the role that research plays in enriching our understanding of life, and the ways in which the profession of psychology serves to improve the human condition through ethical research, practice, and application.

A major in Psychology offers a number of desirable skills. First, students develop a sophisticated understanding of the complexities of human behavior and thinking. Second, students develop quantitative and research skills that allow them to appreciate and undertake the study of human behavior and thinking. Third, students gain interpersonal skills for collaboration and teamwork. In addition, students become part of a community of scholars that includes faculty, graduate students, and fellow undergraduate students.

Degree Earned
B.A.

Required for Graduation
• Courses
  • Major: 12
  • Total: 40
• Credits
  • Major: 37
  • Total: 120
• GPA
  • Major: 2.0
  • Cumulative: 2.0

Student Learning Outcomes
Upon completion of a psychology major, students will be able to:
• Recognize key concepts, principles, and overarching themes in psychology.
• Utilize skills in scientific reasoning for consuming and producing psychological research.
• Communicate statistically supported findings in psychology.
• Recognize major ethical issues in psychological research.
• Apply knowledge base in psychology to one of the following areas of psychology: emotions, biological psychology, history and systems, or personality.

Progress Chart
Level One - Core Courses
12 courses and 2 modules required.

Major Requirements
Major requirements include 4 Level Two ILO requirements, fulfilled through the major.

Students in this major must complete 40 courses in total in order to graduate. 12 courses will be from this major program.

4 additional PSY electives

Free Electives
In addition to the requirements listed above, students must take enough courses to fulfill graduation credit requirements for their School and major.

Total Credits: 87

NOTE. The following students use Level 2 Capstone Experience in Major instead of FYS 130 First-Year Academic Seminar: Honors, BUSCA, Core-to-Core, Transfer, and Non-Traditional/Evening.

The Modules are not required for Transfer Students, Core-to-Core Students, or BUSCA Students. BUSCA students are required to take modules if/when they pursue a bachelor’s degree.

Recommended Course Sequence
We strongly recommend that students consult with their academic advisers in planning their course sequence in the math, statistics, and research design courses.

Minors
- Psychology, Minor (http://catalog.lasalle.edu/undergraduate/arts-sciences/psychology/psychology-ba/psychology-minor/)

Course Descriptions
Psychology

PSY 155 Introduction to Psychology
This course provides a general introduction to the discipline of psychology. Emphasis is given to the methods, theories, and findings of psychological research. Areas covered may include biological bases of behavior, learning, perception, thinking, development, personality, abnormality, and social behavior.

PSY 170 Special Topics
PSY 171 Special Topics

PSY 210 Developmental Psychology
This course provides a study of the theories and research relevant to understanding human development from conception through adulthood, with special emphasis on childhood and adolescence. Biological, cognitive, and socioemotional processes are examined.

PSY 215 Adult Development and Aging
This course is an introduction to the scientific study of adulthood, with a special emphasis on gerontology. Focuses on the theories, principles, and research related to cognitive change and on social development, particularly in the context of intergenerational relationships.

PSY 220 Psychopathology
This is an introductory course surveying the principal forms of mental disorders, with emphasis on causes, symptoms, and treatment. An analysis of the problem of maladaptive behavior and the study of certain personality and behavior patterns.

PSY 225 Social Psychology
This course provides a study of the research findings and theories dealing with the phenomena of social behavior. Focuses on individual behavior as it affects and is affected by the behavior of others.

PSY 230 Industrial and Organizational Psychology
This course offers a study of psychological principles and theories to organizational settings. Topics examined include research methodology, employee selection and assessment, leadership, motivation, job satisfaction, and characteristics of the workplace that affect employee and organizational well-being. Prerequisite(s): PSY 310
PSY 242 Introduction to Language and Communication
This course presents an introduction to linguistics, which is the study of human language and communication. Each major branch of linguistics is surveyed with an emphasis on the structure, content, and use of English. This course also explores language variation and the relationship between language and culture, language and the brain, and how children develop language. Students practice techniques for linguistic analysis, and clinical applications to the fields of speech-language pathology and psychology are discussed. This class is cross-listed with COSD 100.

PSY 245 Forensic Psychology
This course addresses selected topics in the area of forensic psychology. The focus of the course will center on the theory, science, applications, and practices of psychology in the criminal justice system. Topics will include police and investigative psychology, family forensic psychology, psychology of crime and delinquency, legal psychology, expert witness testimony, and issues related to corrections.

PSY 250 Human Sexuality
This course is a survey of the theory, research, and issues related to sexuality from a psychological perspective. Topics will include the biological, psychological, and social foundations of human sexuality, human reproduction, cross-cultural perspectives on social behavior and contemporary society, gender roles and stereotypes, the expression of human sexuality, sexual deviancy, and violence.

PSY 255 Psychology of Women
This course provides an overview of psychological theory and research related to the study of women, including research on gender, gender socialization, and sex differences. It will evaluate traditional views and feminist perspectives. Students will learn how gender and sexism interact with ethnicity, class, and age across the lifespan to influence women's lives and understandings.

PSY 260 Sport Psychology
Students will be introduced to concepts in sport psychology. Issues of individual athletes, athletic teams, and sport psychology interventions are discussed. Students are introduced to conceptualizing and presenting sport psychology issues and interventions.

PSY 265 Stress and Health
This course explores the relationship between stress and health through both a didactic method as well as experiential group exercises, journal writing, guided imagery, and drawing. Introduction to stress-management strategies is provided through readings and hands-on application of demonstrated techniques.

PSY 270 Special Topics
This course examines contemporary issues in psychology (e.g., psychology of women, drug abuse, forensic psychology, sports psychology, or prejudice). Prerequisite: varies with topics.

PSY 271 Special Topics
This course examines contemporary issues in psychology (e.g., psychology of women, drug abuse, forensic psychology, sports psychology, or prejudice). Prerequisite: varies with topics.

PSY 272 Special Topic
PSY 273 Special Topics
PSY 275 Special Topics
PSY 276 Special Topics
PSY 310 Statistics I
This course is the first semester of a two semester sequence in statistics covering descriptive and inferential statistics and the logic of hypothesis testing. Emphasis in this course is on understanding the statistical technique and its meaning in making research decisions.

PSY 311 Statistics II
This course is the second part of a two semester sequence in statistics focusing on the use of SPSS as a tool to assist in describing data, hypothesis testing, and making data supported decisions. Emphasis in this course is on the analysis of data and the communication of statistically supported findings. Prerequisite(s): PSY 310

PSY 330 Research Design I
This course focuses on introducing students to the techniques and methods of descriptive and inferential research, as well as research ethics, as they are applied to psychological science. Prerequisite(s): PSY 155, PSY 310, and 311.

PSY 331 Research Design II
This course offers lectures, discussions, and practice in the application of psychological theory and research design to the development of an original research study. Each student completes a literature review, develops study aims and hypotheses, plans a research method, and writes a study proposal. Considerations for ethical conduct of research and research dissemination are discussed as well. Options are available for collecting and analyzing data during this course or in future research independent studies. Prerequisite(s): PSY 310, PSY 311, and PSY 330

PSY 340 Psychological Assessment
This course examines the selection, administration, and interpretation of psychological tests used in the measurement of aptitudes, achievement, interest, and personality. Prerequisite(s): PSY 155 and PSY 310

PSY 342 Speech and Language Development
This course explores the specific nature, sequence, and patterns of language development from birth through adolescence and its relation to other aspects of child development. Conditions that place infants and children at risk for speech and language disorders are explored. Patterns of normal language development are discussed as guide for the evaluation and treatment of children with developmental language disorders. Prerequisite(s): COSD 100 or PSY 242, or permission of instructor. This course is cross-listed with COSD 203.

PSY 350 Counseling Theories and Principles
This course addresses the theories and principles of the counseling process. The dynamics of human change. The objectives, work, and continuing problems of counseling. Prerequisite(s): PSY 155

PSY 360 Health Psychology
This course is an overview of key topics, theories, and issues in Health Psychology. Topics include stress, eating, exercise, coping, and the effect of individual traits and psychological/social processes on health. Previously, this special topics course focused exclusively on stress. It has been extended to reflect trends in the fields of psychology and managed care. The intent is to help students become more prepared for entry into graduate school, medical school, or a professional setting. Prerequisite(s): PSY 155
PSY 370 Special Topics
This course examines contemporary issues in psychology (e.g., psychology of women, drug abuse, forensic psychology, sports psychology, or prejudice). Prerequisite: varies with topics.

PSY 371 Special Topics
This course examines contemporary issues in psychology (e.g., psychology of women, drug abuse, forensic psychology, sports psychology, or prejudice). Prerequisite: varies with topics.

PSY 372 Special Topics

PSY 375 Special Topics

PSY 379 Special Topics

PSY 405 Emotions
This course about emotion will cover basic theoretical perspectives, including biological foundations, and essential emotion processes such as emotion regulation. Individual emotions such as happy, sad, angry, etc. will be discussed. The course will culminate with brief discussion of emotion-related constructs such as empathy and positive psychology. Restriction(s): Sophomore standing or above. Prerequisite(s): PSY 155

PSY 410 Theories of Learning
This course is an analysis of the principal theories of learning in light of recent experiments in animal and human learning. Restriction(s): Sophomore standing or above. Prerequisite(s): PSY 155

PSY 415 Cognitive Psychology
How do we acquire, store, retrieve, and use knowledge? This course investigates how we make sense of our experience by examining classic and contemporary theory and research in human information processing, the representation and organization of knowledge, and the use of higher cognitive skills. Topics may include attention, perception, memory, imagery, language, problem solving, creativity, reasoning, and decision making. Restriction(s): Sophomore standing or above. Prerequisite(s): PSY 155

PSY 420 Biological Psychology
This course is an introduction to the neurological and endocrinological bases of behavior. Consideration is given to sensory and motor processes, motivation and emotion, and learning and memory. Restriction(s): Sophomore standing or above. Prerequisite(s): PSY 155

PSY 425 Theories of Personality
This course is a systematic study of the principal theories of personality with particular emphasis on recent trends, research methodology, and personality measurement. Restriction(s): Sophomore standing or above. Prerequisite(s): PSY 155

PSY 430 History and Systems of Psychology
This course examines the beginnings and development of psychology as a science and profession; psychology’s historical roots in philosophy, biology, and national culture. Restriction(s): Sophomore standing or above. Prerequisite(s): PSY 155

PSY 444 Research in PSY I
This course provides the student with an opportunity to do research with a faculty member. The student and the faculty member agree on the research project before the student registers for the course.

PSY 445 Research in PSY II
This course is a continuation of the 444 research course. It provides the student with an opportunity to continue to conduct research with a faculty member.

PSY 470 Special Topics
This course examines contemporary issues in psychology (e.g., psychology of women, drug abuse, forensic psychology, sports psychology, or prejudice). Prerequisite: varies with topics.

PSY 471 Special Topics
This course examines contemporary issues in psychology (e.g., psychology of women, drug abuse, forensic psychology, sports psychology, or prejudice). Prerequisite: varies with topics.

PSY 480 Seminar
This course provides readings, discussion, and analysis of contemporary psychological theories and research; individual student research and presentation of paper. Restriction(s): Junior or senior standing as psychology major or minor.

PSY 481 Seminar
This course provides readings, discussion, and analysis of contemporary psychological theories and research; individual student research and presentation of paper. Restriction(s): Junior or senior standing as psychology major or minor.

PSY 490 Psychological Research
This course provides the student with an opportunity to do research with a faculty member. The student and the faculty member must agree on the research project before the student signs up for the course. Restriction(s): Junior or Senior standing as a psychology major or minor. May be taken either or both terms. Prerequisite(s): PSY 155, PSY 310

PSY 491 Internship
This course provides students with off-campus opportunities to work in clinics, schools, businesses, or the criminal justice system. It may be taken either or both semesters. Restriction(s): Junior or senior standing as a psychology major, 60 credits completed, 3.0 overall GPA

PSY 495 Internship
This course provides students with off-campus opportunities to work in clinics, schools, businesses, or the criminal justice system. It may be taken either or both semesters. Restriction(s): Junior or senior standing as a psychology major, 60 credits completed, 3.0 overall GPA
